Rustic Charm
Possessing the hand-finished look of quarried stone, the StoneLedge™ Fire Pit comes with everything you need to create a warm, inviting focal point for entertaining and relaxing. Its value, beauty, durability and ease of construction make the StoneLedge™ Fire Pit a perfect complement to your outdoor living space.
FOUNDATION
Place and compact a level base with gravel extended beyond the StoneLedge Fire Pit by at least 4 inches. The surface of the leveling pad should extend below grade by 2 inches. If you are using a concrete paver base, place the Ashland Fire Pit directly onto the base. Fill the bottom with 2-4 inches of sand for drainage.

THE FIRST LAYER OF BLOCK
Lay out the StoneLedge Fire Pit with a 30” diameter from the inside wall. Use 20 blocks per layer (13 medium, 7 small). Start each layer by setting one medium unit. Then place one small unit followed by two medium units in a repeating pattern. Adjustments to the circle of blocks may be necessary to ensure alignment as the blocks should fit tightly together. Ensure the first layer is level.

ADDITIONAL LAYERS
Glue the second layer of blocks above the first layer using a concrete-approved adhesive. Each layer should offset to avoid joints lining up on the block above or below.

FIRE PIT COLORS
- coastal tan
- fieldstone
- granite
- mesquite

STONELEDGE ROUND PIT
Shown with optional coping.
