SUFFOLK™ FIRE PIT

Simply Casual
With its soft-tumbled appearance and single unit system, the Suffolk Fire Pit is not only attractive, but easy to install.

Being our largest pit, it is a great size for gatherings with family and friends.
FOUNDATION
Place and compact a level base with gravel extended beyond the Suffolk Fire Pit by at least 4 inches. The surface of the leveling pad should extend below grade by 2 inches. If you are using a concrete paver base, place the Suffolk Fire Pit directly onto the base. Fill the bottom with 2-4 inches of sand for drainage.

THE FIRST LAYER OF BLOCK
Lay out the Suffolk Fire Pit with a 50” diameter from the inside wall. Use 17 blocks per layer. Adjustments to the circle of blocks may be necessary to ensure alignment as the blocks should fit tightly together. Ensure the first layer is level.

ADDITIONAL LAYERS
Glue the second layer of blocks above the first layer using a concrete-approved adhesive. Each layer should offset so that each stone is centered with the center of the two stones beneath.

FIRE PIT COLORS
- coastal tan
- fieldstone
- granite
- mesquite

COPING COLORS
- charcoal
- mocha
- sand

Optional 2-piece steel ring (works with or without coping).
Optional 4-piece radius coping. 68” outside dia. 47” inside dia.

Important Note:
Burning large items or trash in fire pits may cause damage to block units. Our fire features are designed strictly for small campfires.

NewLine recommends a steel insert to protect block and coping units. NewLine will not be held liable for any damage to the fire pit or coping if an insert is not used.
