SIMPLY BRILLIANT
Yorkshire™ is a tumbled, single-piece wall system that is perfect for a DIY fire pit kit.

With Yorkshire’s ease of construction, you can have your fire pit up and burning in an afternoon.
FOUNDATION
Place and compact a level base with gravel extended beyond the Yorkshire Fire Pit by at least 4 inches. The surface of the leveling pad should extend below grade by 2 inches. If you are using a concrete paver base, place the Yorkshire Fire Pit directly onto the base. Fill the bottom with 2-4 inches of sand for drainage.

THE FIRST LAYER OF BLOCK
Lay out the Yorkshire Fire Pit in a square design with 28" x 28" from the inside wall. Use 12 blocks per layer. Adjustments to the blocks may be necessary to ensure alignment as the blocks should fit tightly together. Ensure the first layer is level.

ADDITIONAL LAYERS
Glue the second layer of blocks in a reversed pattern above the first layer using a concrete-approved adhesive. The third layer should be reversed again to offset the joints as seen in the illustration. Finally, reverse the last course of block and glue in place.

FIRE PIT COLORS
coastal tan
fieldstone
granite
mesquite

COPING COLORS
charcoal
mocha
sand

Yorkshire Rectangle Pit
Dimensions (in) | pieces | wt./pallet
44 x 44 x 16 | 50 | 1142

OPTIONAL ACCESSORY
Steel Insert

Important Note:
Burning large items or trash in fire pits may cause damage to block units. Our fire features are designed strictly for small campfires.

NewLine recommends a steel insert to protect block and coping units. NewLine will not be held liable for any damage to the fire pit or coping if an insert is not used.
