holland stone in fieldstone

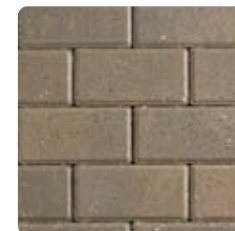

Holland Stone™

The design flexibility, simple rectangular shape, and ease of installation make Holland Stone a favorite for homeowners. It is often used as an accent or border course with other NewLine pavers.

4x8x2½

Colors

fieldstone

granite

coping in coastal tan (retired color)

Coping™

Our Coping unit provides a smooth, soft roll to the edge of your patio or steps. Coping can be used for applications such as swimming pools, deck overhangs, step treads, seating areas, and wall caps.

6x12x2 3/8

Colors

granite

charcoal

Color swatches are for reference. Please refer to actual samples for proper color matching.

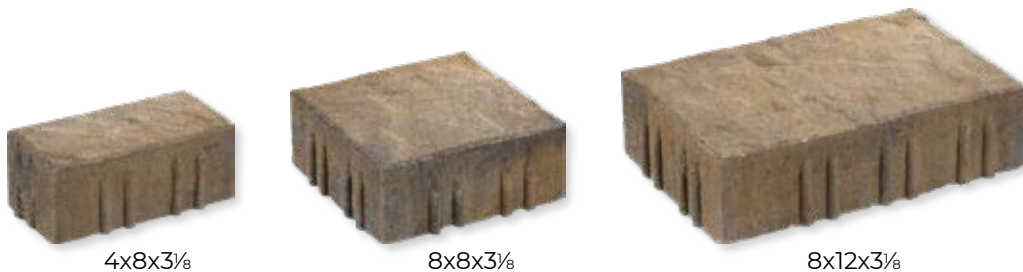

newlinehardscapes.com

Breton™

Breton **permeable pavers** are a three-piece mixed bundle (all on one pallet), crafted with a natural, stone-cleft finish. Enlarged lugs on the units' sidewalls create quarter-inch joints that drain water to the permeable base when filled with a properly-sized aggregate. This infiltration filters stormwater and recharges groundwater sources, creating a sustainable pavement option.

4x8x3/8

8x8x3/8

8x12x3/8

newlinehardscapes.com

fieldstone

granite

Turfstone™

A rectangular, **permeable slab** (with open grids) allows water to pass through the system. Turfstone can be used for overflow parking, erosion control, and parking lots requiring permeable paving. The open voids can be filled with drainage aggregate for maximum infiltration, or with soil to allow greenery to grow.

Pallet B

Pallet C

Corner Pallet

Colors

Color swatches are for reference. Please refer to actual samples for proper color matching.

grand ledge in ash

Grand Ledge™

Grand Ledge blocks provide the texture of chisled limestone with a crisp, contemporary, grand scale appearance. The blocks are 12" tall and come in four different lengths. The unit depths create a consistent 2¼-inch setback, and the 7½° taper from the face allows for subtle curves. Grand Ledge corner and coping units can be used for corners, top blocks, or freestanding applications, providing the perfect finishing touches for every project.

Standard Wall Units

12x20x36

12x20x48

12x20x60

12x20x72

Corner Units

12x24¼x35¼

12x21x46

12x25½x50½

Coping Units

12x19¾x42¾

12x21x46

FEATURES

- 24 unique wall textures
- Four additional 4-sided blocks can be used for corners, top blocks, & freestanding walls
- Capable of 5-6 foot gravity walls with optimal site conditions
- Minimum radius is 20'. However, we recommend limiting the radii of curves to no less than 30' for better constructability and aesthetics

heartwood in gray birch

Heartwood™

When you're looking to integrate natural wood into your project, consider Rosetta Heartwood wall units. Root yourself in nature with a product that is more durable than pressure-treated lumber and hits the mark of authenticity. A more efficient and durable alternative to wood so you can build a freestanding wall, planter box, or garden wall that will last without compromising the natural woodgrain look.

6x8x42

*Consider a matching fire pit
for your Heartwood wall project.
For more info, see page 54.*

- More durable than pressure-treated lumber.
- Provides a low-maintenance alternative to lumber products.
- Easily stackable.

Belvedere™

Our most popular Rosetta wall system, Belvedere gives your project the look of real natural stone because it is formed using molds from natural stone. An easy-to-install, six-piece system provides a more rustic appearance to your space.

Colors

ash

canyon

saddle

Color swatches are for reference. Please refer to actual samples for proper color matching.

Dimensional™

Perfect for the do-it-yourselfer, Dimensional wall is a simple system that is lightweight and installs quickly. Great for smaller walls, tree rings, and seating areas, the natural stone texture gives this system the look of real chiseled stone on a smaller scale.

newlinehardscapes.com

Stonegate®

Featuring the look of weathered cut-stone you might find in a quaint European town, Stonegate has a smoother finish than split-face wall units. With a pinned connection method, two different heights, and six different shapes, Stonegate is suitable for retaining and freestanding wall projects.

Use the vertical batter option (middle pin hole position on block top) for small freestanding applications and short, geogrid-reinforced walls. On critical, engineered retaining walls with slopes or surcharges above, use the rear pin hole position on block top to provide the necessary batter for added strength and durability. Stonegate freestanding applications should *not* exceed 24" above grade.

Stonegate walls use DOM pins to ensure proper wall alignment. Pins sold separately.

newlinehardscapes.com

BACKYARD
RETREAT

Stonegate® Contemporary

The smooth, uniform face and finished edges of Stonegate Contemporary create a modern, sleek look. Stonegate Contemporary is excellent for parapet walls, pilasters, columns, stairs, and outdoor living elements such as kitchens, fireplaces, fire pits, benches, and more. Like traditional Stonegate, Stonegate Contemporary features six different units, simplifying the creation of random patterns and assuring stunning results.

Use the vertical batter option (middle pin hole position on block top) for small freestanding applications and short, geogrid-reinforced walls. On critical, engineered retaining walls with slopes or surcharges above, use the rear pin hole position on block top to provide the necessary batter for added strength and durability. Stonegate freestanding applications should *not* exceed 24" above grade.

Stonegate walls use DOM pins to ensure proper wall alignment. Pins sold separately.

newlinehardscapes.com

StoneLedge™

StoneLedge features a double-sided, multi-sized, tapered wall system with the hand-finished look of quarried stone. Ideal for residential or commercial wall projects. The flexibility, quarried face, and endless random patterns make StoneLedge an excellent choice.

Use the vertical batter option the StoneLedge connector for small freestanding applications and short, geogrid-reinforced walls. On critical, engineered retaining walls with slopes or surcharges above, use the 1" setback position to provide the necessary batter for added strength and durability.

StoneLedge freestanding applications should *not* exceed 24" above grade.

IMPORTANT NOTE:

Burning large items or trash in fire pits may cause damage to block units. Our fire features are designed strictly for small campfires.

NewLine Hardscapes is not responsible for any damage to the fire pit or radius coping if it is not installed with a steel insert.

See our new smoke-reducing Burley® Pit inserts on the following page.

Burly®

Specialty Fire Pit Inserts Crafted to Reduce Smoke

No one wants to get stuck with the smoky seat around a fire pit. Thus, the birth of the Burly®: a heavy-duty, long-lasting fire feature that is easy to start and is hand-crafted to reduce smoke.

The worst thing about any campfire is having to move whenever the wind shifts. Burly's specially-designed flange and airflow system eliminates smoke almost entirely.

Now, whether you are sitting on your backyard patio or camping in the wilds, there's no bad seat at the fire.

	Each Burley insert comes with a matching snuffer lid to provide a perfect-fitting way to put out your fires.	

BENEFIT HIGHLIGHTS:

- Easy clean out
- Insert protects manufactured or natural stone from direct-heat damage
- Hand-crafted in the USA using long-lasting, heavy-gauge steel
- No assembly required
- Snuffer lid (included) puts out fires and protects interior from the elements

Gator Nitro-X Sand

NITRO JOINT SAND is the ideal air cure, permeable jointing material. It is a ready-to-use mixture of calibrated sand and proprietary resin formula which cures when exposed to air, hardening from top to bottom of the joint. The product can be installed in wet or dry weather.

Gator X-Turf

GATOR X-TURF is a high-end artificial turf blended with soft, fine yarn. The C-shaped blades are durable and prevent the turf from matting under heavy use. With great water permeability, X-Turf residential and commercial grass can quickly alleviate the problem of rainwater accumulation. X-Turf synthetic turfs are free from heavy metals and harmful substances; and with a fire-resistance level, meet the requirements of both indoor and outdoor applications.

Landscape Lighting

Accent Lights

LMAFSB: UPLIGHT SPOT, RIBBED

- Housing: Heavy-duty solid brass
- Standard Lamp: 5W LED MR16
- Socket: Bi-Pin GU5.3
- Gasket: High-temp silicone O-ring
- Shroud: Mach. brass, tempered glass
- Electrical Requirements: 12-volt
- Wiring: 3' 18/2, SPT-2W UL wire
- Spike: PVC
- Lens: Convex lens
- **Finish: Antique brass**

LMAFBA: UPLIGHT SPOT - Aluminum

- Housing: Die-cast aluminum
- Standard Lamp: 5W LED MR16
- Socket: Bi-Pin GU5.3
- Electrical Requirements: 12-volt
- Wiring: 3' 18/2, SPT-2W UL wire
- Lens: Convex lens
- **Finish: Brown**

LMAFBKA: UPLIGHT SPOT - Aluminum

- Housing: Die-cast aluminum
- Standard Lamp: 5W LED MR16
- Socket: Bi-Pin GU5.3
- Electrical Requirements: 12-volt
- Wiring: 3' 18/2, SPT-2W UL wire
- Lens: Convex lens
- **Finish: Black**

LMAASB: UPLIGHT SPOT, ADJUSTABLE - Brass

- Adjustable accent light fixture
- Housing: Heavy-duty solid brass
- Standard Lamp: 5W LED MR16
- Socket: Bi-Pin GU5.3
- Gasket: High-temp silicone O-ring
- Shroud: Mach. brass, tempered glass
- Electrical Requirements: 12-volt
- Wiring: 3' 18/2, SPT-2W UL wire
- Spike: PVC
- Lens: Convex lens
- **Finish: Antique brass**

WASH LIGHTS - Brass

- Housing: Heavy-duty solid brass
- Standard Lamp: G4 MAX 5W
- Socket: Bi-Pin GU5.3
- Gasket: High-temp silicone O-ring
- Shroud: Mach. brass, tempered glass
- Electrical Requirements: 12-volt
- Wiring: 3' 18/2, SPT-2W UL wire

Large: **LMLWWLSAB**
Small: **LMLWWMSAB**

LMLWWFBA: WASH LIGHT - Aluminum

- Housing: Heavy duty solid brass
- Standard Lamp: G4 MAX 5W
- Socket: Bi-Pin GU5.3
- Gasket: High-temp silicone O-ring
- Shroud: Mach brass, tempered glass
- Electrical Requirements: 12-volt
- Wiring: 3' 18/2, SPT-2W UL wire
- Spike: PVC
- Lens: Frosted glass
- **Finish: Brown**

Specialty Lights

HARDSCAPE LIGHT - Brass

- Housing: Brass
- Power: 4 - 7 Watts
- Color Temperature: 2700°K
- Lens: Clear lens
- Mounting: Stainless bracket
- Wiring: 3' 18/2, SPT-2W UL wire

LMHLSB: Brass 

HARDSCAPE LIGHT - Aluminum

- Housing: Aluminum
- Power: 4 - 7 Watts
- Color Temperature: 2700°K
- Lens: Clear lens
- Mounting: Stainless bracket
- Wiring: 3' 18/2, SPT-2W UL wire

Care Information

Color

The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books, and online photos. However, NewLine cannot guarantee exact color matching. Our pavers and walls can vary slightly in color depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match. Final color selections should be made at your local dealer from stock product or displays. NewLine always recommends immediately verifying the product and color upon receipt. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes its acceptance. Proper installation enhances the overall color of pavement. Units should be randomly picked from at least two pallets when installing. This creates a subtle blending of color.

Efflorescence

Our warranty does not apply to efflorescence. Efflorescence is a whitish, powderlike deposit that can appear on the surface of concrete products. When cement hydrates, calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide (from the air) to form water-insoluble calcium carbonate, which is called efflorescence. Efflorescence does not have an effect on the structural performance or durability of the concrete pavers. NewLine includes admixtures in their concrete products to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. NewLine does not warrant concrete pavers or walls that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months following installation. It may remain for months or some of it may wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence-removers. Before applying any chemicals to remove deposits, please consult your local dealer for efflorescence removal chemicals.

Polymeric Haze

Polymeric haze from the use of polymeric joint sand may appear on your concrete products if the sand was not removed from the surface of the paver properly. This does not affect the integrity of the product or your installation. The hazing will weather away naturally with time and rain. It can be removed with a specialized cleaner; you are advised to contact your contractor or the polymeric sand company for advice on recommendations. NewLine accepts no responsibility or liability for this occurrence.

Construction Residue

A by-product of cutting with a saw is residue-filled water or concrete dust. Residue-filled water or re-hydrated dust can cling to the surface and leave a concrete stain. It is recommended to wash and remove the water or concrete

dust from the surface of the pavers before it dries. Construction residue can also happen through soil disturbance or environmental elements. These contaminants should be removed immediately but do not affect the integrity of the product or your installation. NewLine accepts no responsibility or liability for these occurrences.

Compactor and Snow Removal

NewLine pavers with textured surfaces have high and low points on the surface that provide an aesthetic appeal. However, pavers with textured surfaces are susceptible to surface scuffing when they are compacted into place. Therefore, these types of pavers should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the pavers. This system will help ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet or cardboard. Manufacturers of plate compactors are able to recommend other products that also can be used for this purpose. For further information on paver details, technical information, and recommended construction practices, visit ICPI at www.cmha.org.

A plate compactor should not be used on our Porcelain Tile, Veranda/Chateau XL, and Rosetta Flagstone pavers. Also, snow removal equipment should have the proper spacing, bumpers, and rubber blade guards to protect the surface of the pavers. NewLine will not be held responsible for damage caused by the misuse of compaction or snow removal equipment which leaves scuff marks or burns on pavers.

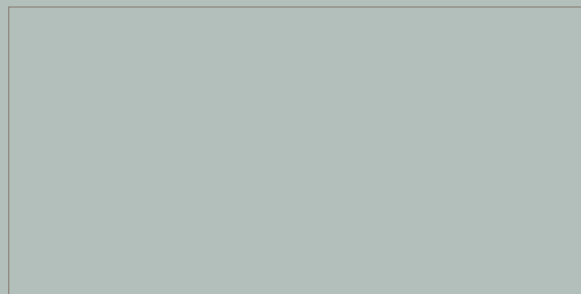

Limited Lifetime Transferable Warranty

NewLine Hardscapes backs our manufactured paver and wall products with a lifetime transferable warranty, guaranteeing our products against manufacturing defects. This warranty is for residential construction only and is applicable where products have been correctly installed to meet industry specifications. Color variances and the appearance of efflorescence do not constitute a warranty claim. Any defective products will be replaced; however, replacement labor and transportation costs are not included in this warranty. All warranty claims must be made

prior to the removal or disposal of the defective product. We will honor this transferable warranty with a proof of purchase (invoice or delivery ticket).

The foregoing warranty is exclusive and in lieu of all other express or implied warranties of any kind. Furthermore, NewLine disclaims all implied warranties of merchantability as well as all implied warranties of fitness for a particular purpose. NewLine shall not be liable for any consequential damages or incidental damages arising from any warranty claim made against it.

NOTE: This warranty does not apply to any breakage, chipping or other deterioration caused by improper design or installation which does not comply with applicable codes, the ICPI, CMHA and recognized work procedures. Visit www.icpi.org or www.cmha.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligent act on the part of the purchaser, owner of the building, installer or any third party.
