ROSETTA[®]

BY NEWLINE HARDSCAPES[®]

The Rosetta portfolio of products accurately recreates the look and feel of a natural setting for your project.

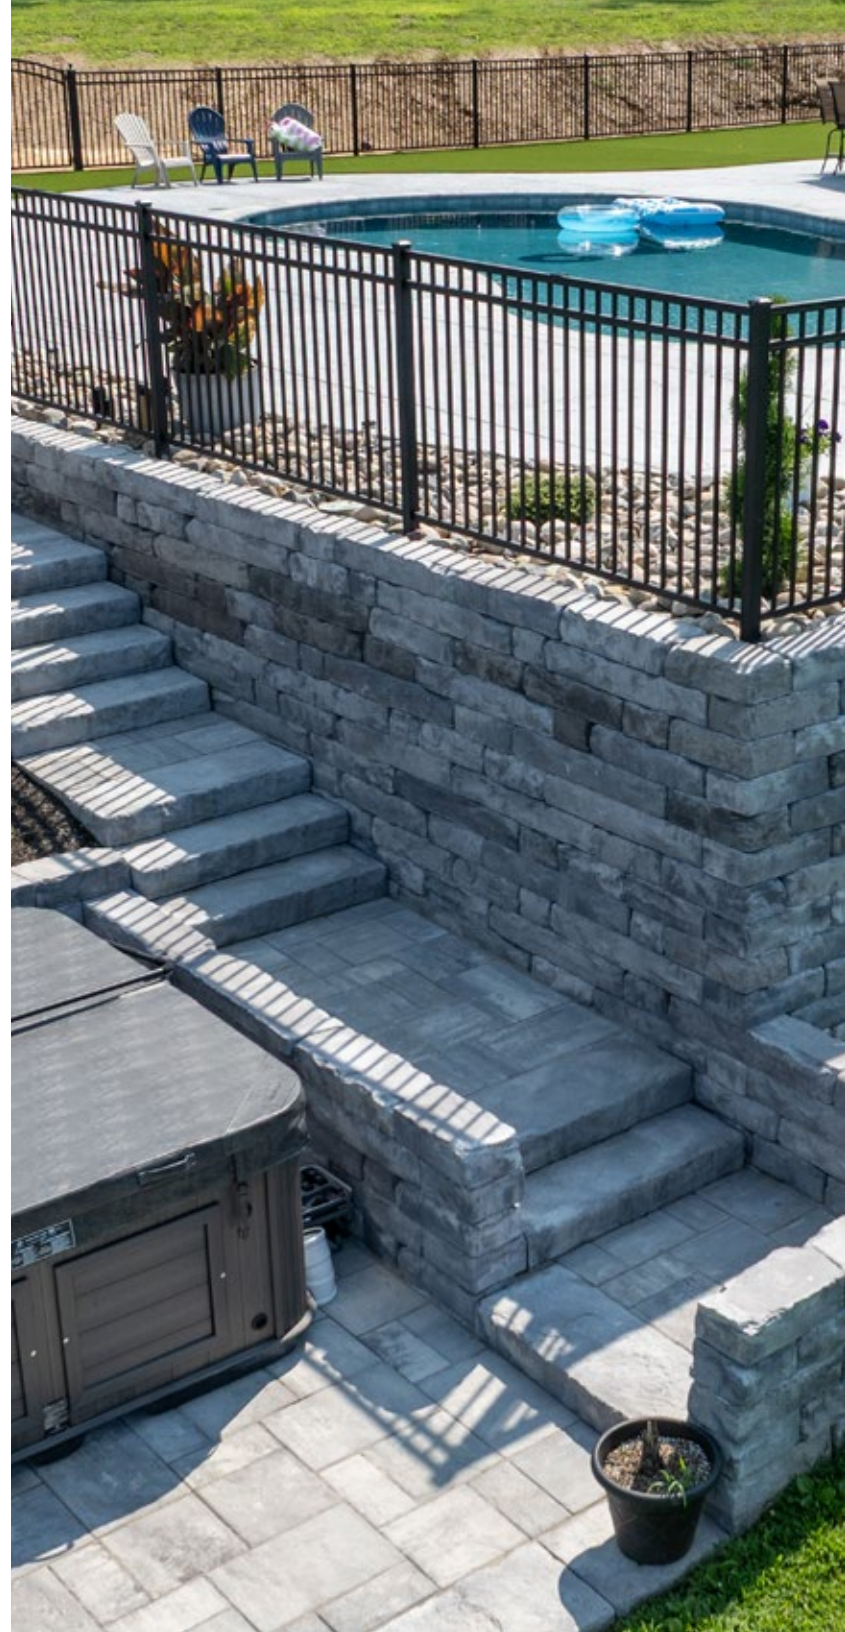

Rosetta products are produced by NewLine Hardscapes using wet-cast concrete with integral color, giving them the most natural, multi-toned appearance on the market today. What sets Rosetta apart is the richness of shapes found in each collection. Rosetta products are inspired by—and modeled after—natural stones.

Rosetta products are engineered to exacting specifications that ensure your project will stand the test of time. Technical resources for Rosetta products are available at www.DiscoverRosetta.com.

Outcropping™ Wall

The large dimensions of the Outcropping units allow you to create grand structural walls in a scale that is both believable and inspiring. The Outcropping collection was designed with 12 unique size units and 24 unique stone textures to create the most natural appearance possible. Fully engineered to exacting specifications, the Outcropping collection is not limited by the inconsistent properties of natural stone, yet maintains its appearance and feel. Given its large size, Outcropping is designed to be machine-laid, making installation fast and easy.

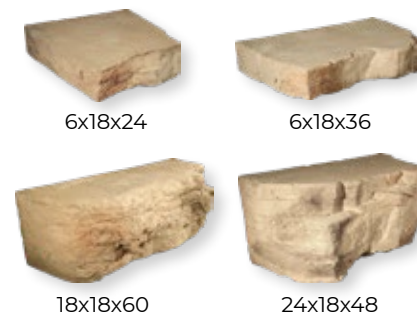

Pallet A

Pallet B

Pallet C

Corner Pallet

Features

- Beautiful weathered-stone textures
- Large interlocking units create a fully-engineered, strong, structural retaining wall
- Consistent dimensions = fast installation
- All Outcropping units average 18" +/- depth

Grand Ledge™

Grand Ledge blocks provide the texture of chisled limestone with a crisp, contemporary, grand scale appearance. The blocks are 12" tall and come in four different lengths. The unit depths create a consistent 2¼-inch setback, and the 7½° taper from the face allows for subtle curves. Grand Ledge corner and coping units can be used for corners, top blocks, or freestanding applications, providing the perfect finishing touches for every project.

Standard Wall Units

Corner Units

Coping Units

Features

- 24 unique wall textures
- Four corner units can be used for freestanding walls
- Capable of 5-6 foot gravity walls with optimal site conditions
- Minimum radius is 20'. However, we recommend limiting the radii of curves to no less than 30' for better constructability and aesthetics.

Heartwood™ Wall

When you're looking to integrate natural wood into your project, consider Heartwood. Root yourself in nature with a product that is more durable than pressure-treated lumber and hits the mark of authenticity. A more efficient and durable alternative to wood so you can build a freestanding wall, planter box, or garden wall that will last without compromising the natural woodgrain look.

Unit

6" x 8" x 42"

*Consider a matching fire pit
for your Heartwood wall project.
For more info, see page 29.*

Features

- More durable than pressure-treated lumber
- Provides a low-maintenance alternative to lumber products
- Easily stackable

Kodah™ Wall

The clean, linear lines of our Kodah™ wall delivers the rugged look of chiseled limestone with gracefulness. As with all Rosetta® products, the uniform rise of Kodah means fast installation and a strong, safe structure. And with four separate unit shapes with finished front and back faces, your design options are limitless. Kodah can be utilized seamlessly on both casual rustic and modern contemporary projects.

Units

Dimensional Steps™

The Dimensional Step is ideal for more formal, linear settings, providing you with the rugged attractiveness of natural stone, but combining it with the safety and comfort of a uniform rise.

Unit

- 7"H x 18"D x 4'L
- 500 lbs/pc
- Dimensional Steps feature a 7" rise
- Pallet of 6 total = 3,050 lbs

Features

- Natural texture and shape
- Consistent rise = fast installation and safe end result
- Textured on five surfaces
- Complementary products = creative possibilities

Burly® Inserts

Specialty Fire Pit Inserts Crafted to Reduce Smoke

No one wants to get stuck with the smoky seat around a fire pit. Thus, the birth of the Burly®: a heavy-duty, long-lasting fire feature that is easy to start and is hand-crafted to reduce smoke.

The worst thing about any campfire is having to move whenever the wind shifts. Burly's specially-designed flange and airflow system eliminates smoke almost entirely.
